

The MIMIT™ Seminar Series 08/09: SEMESTER ONE

www.mimit.org.uk

The MIMIT™ Seminar Series is open to anyone with an interest in innovative technology for healthcare, including clinicians, engineers, scientists, industry and students. Speakers have been carefully selected to illustrate the potential impact of cutting edge technologies on patient care.

For more information on the speakers and their Seminars, visit www.mimit.org.uk/Events

15 Oct	Prof Sandra Downes MIMIT Small Grant Scheme	Regenerating Nerves After Injury: <i>A Novel Polymer Conduit for Peripheral Nerve Repair; & UMIP presentation</i>
22 Oct	Prof Ralf Paus University Lübeck & Manchester	Curing Baldness? <i>Hair follicle & its stem cells; future applications for regeneration</i>
29 Oct	Prof Jöns Hilborn Uppsala University	Regeneration of bone using off-the-shelf injectables: <i>In-vivo homing of stem cells</i>
12 Nov	Prof Alicia El Haj Keele University	Translation of Cell Biomechanics to the Clinic
19 Nov	Dr Matt Dalby University of Glasgow	Cell Responses to Nanotopography
26 Nov	Prof Gus McGrouther University of Manchester	The Human Body as a Machine
3 Dec	Dr Peter Gardner MIMIT Small Grant Scheme	Histopathology Made Simple: <i>Developing spectroscopic methods of grading prostate tissue</i>
10 Dec	Dr Aline Miller University of Manchester	Designing Responsive Fibrillar Scaffolds for Tissue Engineering Applications

Lecture Theatre ~ Manchester Interdisciplinary Biocentre 131 Princess Street, Manchester M1 7DN

Refreshments served from 5.30pm ~ seminar commences at 6pm
